
THE FUTURE OF DOCTORAL EDUCATION IN MANAGEMENT

Jerry Davis
Academy of Management
August 8, 2010

One approach to doctoral education

- The “apprenticeship +” model
 - Lab studies vs. macro research
 - The *Old Country Buffet* approach to choosing joint projects
- What students need: skills + taste
 - Skills to design and execute studies
 - Taste to know what’s worth studying
- Creating a supportive student culture
 - Norms
 - Senior student mentors
 - Enforced interdependence

Challenges and changes

- The challenge: the changing nature of economy and society imply that we need to change both *what* we study and *how* we study it
 - The decline of the “society of organizations”
 - The rise of the network economy
- Changes in doctoral training
 - Greater contextualization to develop “good taste” in research problems
 - Bringing back the literature review
 - A commitment to civic praxis: what if our target audience were “citizens” rather than “managers”?
